No	74%
Yes	26%
Prefer not to say	*%

## METHODOLOGY

The May 2026 Echelon Insights Verified Voter Omnibus was fielded online from May 14-18, 2026 in English among a sample of N=1,008 voters in the Likely Electorate (LE) nationwide using non-probability sampling. The sample was drawn from the Lucid sample exchange based on demographic quotas for registered voters in the likely electorate nationwide, and matched to the L2 voter file to verify respondents' voter registration status.

Measures taken to ensure data quality included measures to prevent duplicate responses, questions designed to disqualify inattentive respondents, and the removal of respondents from the data file who answered more than one-third of the questions they were asked in less than one-third of the median response time per question.

The sample was weighted to reflect modeled turnout and demographic characteristics of the population of voters in the 2026 likely electorate based on a probabilistic model that incorporates data from the US Census Bureau's American Community Survey and Current Population Survey Voting and Registration Supplement, as well as L2 voter file data. Weighting dimensions included gender, age, race/ethnicity, education, region, party, and voting history.

Calculated the way it would be for a random sample and adjusted to incorporate the effect of weighting, the margin of sampling error is +/- 3.5 percentage points.
