1. Dem Non-Primary	14%
2. Dem Primary	20%
3. GOP Non-Primary	16%
4. GOP Primary	22%
5. Unknown	28%

METHODOLOGY

500 registered voters in Nevada were surveyed from October 24 - 26, 2022, with 80% of respondents sampled via text-to-web and matched to the voter file and 20% of respondents sampled via landline live caller and matched to the voter file.

The sample was weighted to population benchmarks for registered voters and the 2022 Nevada Likely Electorate on gender, age, race/ethnicity, education, DMA, party, turnout, and 2020 presidential vote. All benchmarks for the 2022 Nevada Likely Electorate were adjusted for turnout estimates based on a probabilistic model of the likely 2022 midterm electorate derived from the L2 voter file.

Estimates for gender, age, DMA, and party were derived from the L2 voter file. Estimates for race/ethnicity and education were derived from the US Census Bureau's American Community Survey demographic data adjusted to match voter registration estimates from the November 2020 Current Population Survey Voting and Registration Supplement.

The margin of error, calculated the way it would be for a random sample and adjusted to incorporate the effect of weighting, is +/- 4.9 percentage points.
